Cleaning Policy

As this is a home-based boarding facility, cleanliness is of the utmost importance. For those who are curious about how we maintain the health and wellness of our guests and facility, our cleaning policy and regimen is as follows:

Hand-Washing: Hands are washed between the handling of other cats.

Litter Pans: Litter pans are made of stainless steel to minimize bacterial growth. They are scooped twice daily (minimum). Litter pans along with litter shields and scoops are disinfected between guests. Pans are filled with fresh litter.

Toys: Non-porous toys are regularly cleaned with a cleaning solution.

Food/Water Bowls: Stainless steel bowls are used to minimize bacterial growth. Bowls are disinfected between guests.

Cat Condos: Lined with vinyl and cleaned with disinfectant between guests.

Bedding: White, cotton bedding is used due to hypoallergenic properties and durability. Bedding is sanitized in hot water and bleach.

Floors: Floors are swept and mopped regularly.

Catio: Regularly swept and kept free of outdoor debris; treated with natural bug repellents and pet-safe bug barrier.

We are also always inspecting guests for any signs of illness or infestation. In the event we notice anything that could potentially spread to another, we isolate the cat(s) and contact the owners to make pick-up arrangements.
